“Perhaps the most important item that we derive from our experience with WMF is what we have learned from their example: start with the professional expertise, add an unrelenting customer focus and unwavering integrity.”

*Richard A. Patrizia
President
Rabe Environmental Systems*

Ski Areas and Resorts

Today's Ski Area venues must be designed to accommodate the local winter enthusiast and those enjoying a destination vacation. Part of what makes a ski area great is the availability of amenities that are an extension of the skiing and snowboarding experience. Entertainment venues, lodging and a wide spectrum of dining choices add to the visitor's enjoyment and position the resort to become a year-round destination place.

It is no longer about building an environment - it's about designing an experience. Our clients look to us to assist them in crafting a distinctive solution... to create lodges and skier services areas that provide unique and memorable encounters... to separate them from the competition. Our designs reflect the image of the mountain, sensitive to localized surroundings. We draw inspiration from the setting and design a solution that has a relationship with place and is responsive to the user's needs.

Representative Client List
